

Results Your Customers Can Trust: Service Professional Test Strips from Taylor®

Here at Taylor we understand how important profitability is to all service professionals in the pool and spa industry. We've designed these test strips with that in mind: **Service Pro Test Strips (S-1451)** and **PRO 7 Test Strips (S-1452)**. Maintaining **healthy, balanced water** to protect bathers and pool equipment is an essential part of your job, and we realize **chemical sales are the backbone of your business** and that increasing chemical sales begins with testing.

The frequency of testing is important when monitoring **overall water health**. The **S-1451** test strips include the parameters that need to be checked more often (free chlorine, total chlorine or total bromine, pH, and total alkalinity). Testing for these parameters regularly and treating the water accordingly will **prevent more complex and costly problems from developing later**.

When you have a problematic pool, it's often necessary to test a broader range of parameters. The **S-1452** test strips are capable of testing free chlorine, total chlorine or total bromine, pH, total alkalinity, total hardness, and cyanuric acid. These strips were designed to **test the parameters necessary for troubleshooting**. By testing both free and total chlorine, the combined chlorine value can be calculated and adjusted.

sureTREAT® is Taylor's customizable water treatment strategy software developed to simplify water treatment and **strengthen the connection between pool professionals and homeowners**. It is available to download on your PC or as a mobile app. There are many benefits when using the **sureTREAT Service Mobile App**:

- Quickly convert test results into chemical treatment recommendations
- Store test history for each individual customer
- E-mail service reports directly to customers
- Add promotional coupons to the service report

When you use Taylor's Service test strips, **testing time is minimal** which frees you up to service more accounts. The treatment **recommendations you receive are reliable** and **dosages are on target**. Having the right test strip for the job makes all the difference!

USER BENEFITS

- Designed with **pool and spa professionals in mind**.
- **Consistent chemistry** from strip to strip and batch to batch.
- **Simple directions** with **pictograms** provided.
- Shaker bottle **prevents spoilage** from moisture and air.
