SAFETY DATA SHEET

SECTION 1: Identification

Product identifier
- CAN Solution

Product name
- R-0820; R-0820-PL

Recommended use and restrictions
- To be used in accordance with manufacturer instructions or under the direct guidance of the manufacturer.

Manufacturer
- Taylor Technologies, Inc.
  31 Lovetoon Circle
  Sparks, MD 21152
  Phone: (410) 472-4340
  Emergency phone: (800) 837-8548

SECTION 2: Hazard(s) identification

Physical hazards
- Corrosive to metals
  Category 1

Health hazards
- Eye damage/irritation
  Category 1
- Skin corrosion/irritation
  Category 1C

Environmental hazards
- Not currently regulated by OSHA. For additional information, refer to section 12 of the SDS.

Label elements

Signal word
- Danger

Hazard pictograms

Hazard statements
- May be corrosive to metals. Causes severe skin burns and serious eye damage.

Precautionary statements

Prevention
- Do not breathe dust or mists. Wash skin thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection if contact is likely to occur. Keep only in original container.

Response
- IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. IF ON SKIN (OR HAIR): Immediately take off all contaminated clothing. Rinse skin with water. Wash contaminated clothing before reuse. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a physician or poison control center. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Immediately call a physician or poison control center.
- Absorb spillage to prevent material damage.

Storage
- Store in corrosive-resistant container with corrosive-resistant inner liner. Keep tightly capped. Store locked up. Store out of direct sunlight between 36°F–85°F.

Disposal
- Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard not otherwise classified
- Not applicable

SECTION 4: First-aid measures

If inhaled
- Remove individual to fresh air. Seek medical advice/attention if breathing becomes difficult or if respiratory irritation develops.
Give oxygen or artificial respiration if needed.

**In case of skin contact**
Immediately flush skin with plenty of water for at least 20 minutes. If clothing comes in contact with the product, the clothing should be removed and laundered before reuse. Seek medical advice/attention if irritation develops. Chemical burns must be treated by a physician.

**In case of eye contact**
Immediately flush eyes with plenty of water for at least 20 minutes. Remove contact lenses if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.

**If swallowed**
Call a physician or poison control center immediately. Rinse mouth. Never give anything by mouth to a person who is unconscious or is having convulsions. Do NOT induce vomiting unless directed by physician. If vomiting occurs, keep head low so that stomach content does not get into the lungs.

**Most important symptoms and effects, both acute and delayed**
Refer to section 2 and/or section 11 of the SDS for the most important known symptoms and effects.

**Indication of any immediate medical attention and special treatment needed**
Provide general supportive measures and treat symptomatically. Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep person under observation. Symptoms may be delayed.

**General information**
Ensure medical personnel are aware of the material(s) involved and take precautions to protect themselves.

**SECTION 5: Firefighting measures**

**Extinguishing media**
- **Suitable extinguishing media**: Use extinguishing media appropriate for surrounding fire.
- **Unsuitable extinguishing media**: Do not use a heavy water stream. Use of heavy stream of water may spread fire.

**Specific hazards arising from the substance or mixture**
- **Fire hazard**: Not flammable
- **Explosion hazard**: Not explosive
- **Reactivity**: May be corrosive to metals
- **Hazardous combustion products**: Sulfur oxides, cerium oxides, nitrogen oxides. Other irritating fumes and smoke.

**Advice for firefighters**
- **Precautionary measures**: Exercise caution when fighting any chemical fire; hazardous fumes will be present.
- **Firefighting equipment/instructions**: Use water spray or fog for cooling exposed containers.
- **Protection during firefighting**: Do not enter fire area without proper protective equipment, including respiratory protection.
- **Other information**: Refer to section 9 of the SDS for flammability properties.

**SECTION 6: Accidental release measures**

**Personal precautions, protective equipment, and emergency procedures**
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Wear appropriate protective equipment and clothing during cleanup. Do not breathe dust or mists. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protective equipment, refer to section 8 of the SDS.

**Environmental precautions**
Avoid discharge into drains, watercourses, or onto the ground.

**Methods and material for containment and cleaning up**
Ventilate the area. Dike the spilled material where this is possible. Stop leak if it can be done without risk. Absorb spillage to prevent material damage. Absorb in vermiculite, dry sand or earth, and place into containers. Prevent entry into waterways, sewers, basements, or confined areas. Following product recovery, flush area with water. Dilute acid with water and neutralize with dilute base. If not recoverable, dilute with water or flush to holding area and neutralize. Contaminated absorbent material may pose the same hazards as the spilled product. In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

**Reference to other sections**
For exposure controls and personal protection, refer to section 8 of the SDS. For waste disposal, refer to section 13 of the SDS.

**SECTION 7: Handling and storage**

**Personal precautions, protective equipment, and emergency procedures**
Do not breathe dust or mists. Do not get in eyes, on skin, or on clothing. Do not taste or swallow. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. For personal protective equipment, refer to section
Conditions for safe storage, including any incompatibilities
Store in corrosive-resistant container with corrosive-resistant inner liner. Keep tightly capped. Store locked up. Store out of direct sunlight between 36°F–85°F. Store away from incompatible materials (refer to section 10 of the SDS).

Biological limit values
No biological exposure limits noted for the ingredient(s).

Exposure controls
Appropriate engineering controls
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Eyewash facilities and emergency shower must be available when handling this product.

Personal protective equipment
Eye/face protection
Wear appropriate chemical safety goggles if contact is likely to occur.

Skin protection
Wear appropriate chemical-resistant gloves and clothing if contact is likely to occur.

Body protection
Wear appropriate protective clothing if contact is likely to occur.

Respiratory protection
In case of insufficient ventilation, wear suitable respiratory equipment. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fumes at levels exceeding the exposure limits. Advice should be sought from respiratory protection suppliers.

**SECTION 10: Stability and reactivity**

- **Reactivity**: May be corrosive to metals.
- **Chemical stability**: Stable under recommended handling and storage conditions (refer to section 7 of the SDS).
- **Possibility of hazardous reactions**: No dangerous reaction known under conditions of normal use.
- **Conditions to avoid**: Contact with incompatible materials. Do not use in areas without adequate ventilation.
- **Incompatible materials**: Bases, chlorates, halides, hydrogen peroxide, metal compounds, nitrates, nitromethane, organic materials, oxidizing agents, perchlorates, phosphorous, strong reducing agents, and sugars.
- **Hazardous decomposition products**: No hazardous decomposition products under normal conditions.

**SECTION 11: Toxicological information**

- **Information on toxicological effects**
  - **Likely routes of exposure are skin/eye contact and ingestion.**
  - **Most important symptoms/effects, acute and delayed**
    - Direct skin contact may cause corrosive skin burns, deep ulcerations, and possibly permanent scarring.
    - Direct contact with concentrated solutions may be corrosive and may cause severe damage, including blindness. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.
    - Inhalation of mists can cause respiratory irritation. Symptoms may include coughing, choking, and wheezing. Inhalation could result in pulmonary edema (fluid accumulation). Symptoms of pulmonary edema (chest pain, shortness of breath) may be delayed.
    - May produce burns to lips, oral cavity, upper airway, esophagus, and possibly the digestive tract. Symptoms may include abdominal pain, vomiting, burns, perforations, and bleeding.

- **Acute toxicity**: This product is not classified as an acute toxicity hazard. See below for product and individual ingredient acute toxicity data.

SECTION 12: Ecological information
Ecotoxicity  This product is not classified as environmentally hazardous.
Persistence and degradability  No data available
Bioaccumulative potential  No data available
Mobility in soil  No data available
Other adverse effects  Large or frequent spills can have a harmful or damaging effect on the environment.

SECTION 13: Disposal considerations
Collect and reclaim or dispose of in sealed containers at a licensed waste disposal site. Since emptied containers may retain product residue, follow label warnings even after container is emptied. This material and its container must be disposed of in a safe manner. Dispose of contents/container in accordance with local/regional/national/international regulations.

SECTION 14: Transport information
DOT
  UN number  2796
  UN Proper shipping name  Sulphuric acid
  Reportable Quantity  1000 lbs
  Class (Subsidiary risk)  8
  Label(s)  8
  Packing group  II
  Special provisions  386, A3, A7, B2, B15, IB2, N6, N34, T8, TP2
  Packaging exceptions  154
