

New From Taylor

Innovation is required to keep up with the ever-evolving nature of the pool and spa industry. Our new products are developed to both fulfil the needs of the market and advance the industry forward. We have been manufacturing superior water testing equipment for 90 years, and we will continue to meet the high standard of quality we are known for.

XPRESS FLEX

Xpress Flex is the answer for retailers looking for a fast, accurate in-store water testing system that produces results at an affordable rate. It can perform up to 11 tests in one minute and significantly reduces the cost per test when compared to other in-store testing options. The system works directly with our water analysis software, *sureTREAT*®, to create a concise water quality report that can be emailed or printed for the customer.

Tests:

- Free Chlorine 0–10 ppm
- Total Chlorine/Bromine 0–10 ppm
- pH 6.4–8.4
- Total Alkalinity 0–240 ppm
- Total Hardness 0–800 ppm
- Cyanuric Acid 0–300 ppm
- Salt 0–5000 ppm
- Borate 0–100 ppm
- Copper 0–3.0 ppm
- Iron 0–5.0 ppm
- Phosphate 0–3000 ppb

the most trusted name in water testing

PRO 7

The PRO 7 test strips were developed to monitor the overall quality of the water and help with quick troubleshooting. The label provides the ideal ranges generally accepted in the pool and spa industry for ease of use. There are 100 strips to a bottle making it a worthwhile addition to any service pros testing arsenal.

Tests:

- Free chlorine 0–10 ppm
- Total Chlorine 0–10 ppm
- Total Bromine 0–20 ppm
- pH 6.4–8.4
- Total Alkalinity 0–240 ppm
- Total Hardness 0–800 ppm
- Cyanuric Acid 0–300 ppm

K-1720

The K-1720 Visual Determination test kit is a single parameter kit that measures cyanuric acid (CYA) from 0–500 ppm. Due to recent CDC recommendations regarding hyperchlorination, the need to measure CYA at a wider range was needed throughout the industry. We developed this kit to meet the needs of pool/spa service professionals and homeowners.

Tests:

- Cyanuric Acid 0–500 ppm
